EIP Growth and Income Fund 12/31/17

FUND INVESTMENT STRATEGY

The Fund's manager, Energy Income Partners, LLC, ("EIP") has and will continue to focus the equity portion of the Fund's portfolio on steady fee-for-service businesses in energy infrastructure such as pipelines, storage facilities and terminals and in regulated electric utility and renewable power generation. These infrastructure businesses receive fees and tariffs, which are generally not directly related to commodity prices and therefore tend to be less cyclical. EIP typically seeks to limit the Fund's exposure to Energy Companies that derive a significant portion of their revenues from more cyclical businesses, and has the ability to hedge cyclical exposure through short positions. The Fund may also invest in a portfolio of obligations of the U.S. government and its agencies and investment-grade corporate bonds. The Fund typically uses leverage for any purpose consistent with its investment objective, including an attempt to enhance returns. Leverage may be achieved by taking a short position in above mentioned debt obligations or through the use of swaps. The combination of this diversified portfolio of energy infrastructure equities and investment grade bonds along with the use of leverage through short positions and derivatives should provide additional flexibility in portfolio construction.

GROWTH OF \$10,000

as of 12/31/17

*The Institutional Class Shares (EIPFX) commenced operations on 08/22/2006, performance shown of the Investor Class Shares (EIPFX) prior to inception, 10/18/16, is based on the performance of the EIPFX Shares, adjusted for the higher expenses applicable to Investor Class Shares including the 12b-1 fee and the administrative services fee. This performance has not been experienced by any Investor Class shareholder and there is no assurance that the Investor Class shareholder will experience this performance in the future.

PERFORMANCE SUMMARY (%)

as of 12/31/17

	Quarter	YTD	Trailing 1 year	3 Year	5 Year	10 Year	Since inception ^o

The performance data quoted represents past performance and is no indication of future performance. Historical return data includes the reinvestment of dividends and capital gains. Investment return and principal value will fluctuate so that investor shares when redeemed may be worth more or less than their original costs; and the current performance may be lower or higher than the performance quoted. Please call 1-844-766-8694 for the most recent month-end performance.

The Fund was registered under the Investment Company Act of 1940 on August 22, 2006 and offered through a confidential private placement memorandum. On October 18, 2016, Fund shares were registered under the Securities Act of 1933. The Fund performance is net of actual fees and expenses incurred by the Fund.

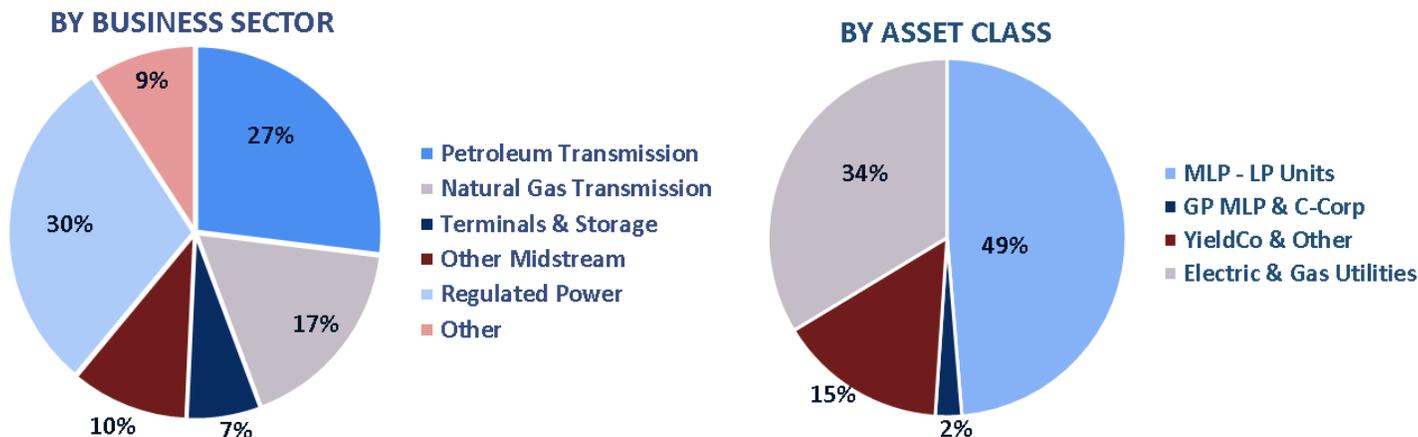

[^]The net expense ratio for EIPFX is 1.94% (4.37% gross) and reflects the expense limitation and reimbursement agreement between the Adviser and the Fund that is effective until April 30, 2019. If such agreement were not in place, the Fund's performance would have been reduced.

ABOUT ENERGY INCOME PARTNERS

Energy Income Partners, LLC (EIP) is a Delaware limited liability company and an SEC-registered investment advisor, founded in October 2003 by Jim Murchie, Linda Longville and Eva Pao. As of December 31, 2017, EIP managed approximately \$6.4 billion in investments.

PORTFOLIO

as of 12/31/17

Portfolio allocation charts represent the total equity exposure of the portfolio as a percentage of net assets. MLP – LP Units asset class allocation may include Pay-In-Kind shares from Enbridge Energy Partners. There is no guarantee that future Fund diversification metrics will be similar to those above. EIP reserves the right to concentrate its investments in any combination that it deems appropriate and may change the concentration and weightings, at any time, at EIPs sole discretion. Charts exclude bond and cash positions. Top Ten Holdings are subject to change at any time.

The fund's investment objective, risks, charges and expenses must be considered carefully before investing. The statutory prospectus may be obtained by visiting www.eipfunds.com, calling (203) 349-8232 or emailing ir@eipfunds.com and should be read carefully before investing as it contains this and other important information about the fund.

Mutual fund investing involves risks including loss of your entire investment. Because the Fund concentrates its investments in the **Energy** Industry, the Fund is subject to greater risk of loss as a result of adverse economic, business or other developments affecting industries within that sector than if its investments were more diversified across different industries. **Energy Companies** are highly sensitive to events relating to international politics, governmental regulatory policies, including energy conservation and tax policies, fluctuations in supply and demand, environmental liabilities, threats of terrorism and to changes in exchange rates or interest rates. **MLPs** are subject to various risks related to the underlying operating companies they control, including dependence upon specialized management skills and the risk that such companies may lack or have limited operating histories. Most MLPs do not pay U.S. federal income tax at the partnership level, but an adverse change in tax laws could result in MLPs being treated as corporations for federal income tax purposes, which could reduce or eliminate distributions paid by MLPs to the Fund. Investments in **Non-U.S.** companies (including Canadian issuers) are subject to risks related to political, social and economic developments abroad, differences between U.S. and foreign regulatory and accounting requirements, tax risk and market practices, as well as fluctuations in foreign currencies. The Fund invests in **Small and Mid-cap** companies, which involves additional risks such as limited liquidity and greater volatility than larger companies. The Fund may invest in **Fixed Income** securities which typically decrease in value when interest rates rise, this risk is usually greater for longer-term debt securities. The Fund may engage in **Short Sales** which are speculative and more risky than long positions (purchases) in securities because in theory, securities sold short have unlimited risk. Short selling will also result in higher transaction costs. The Fund's use of **Derivatives** could lead to substantial volatility and losses. Some derivatives are "leveraged," which means they provide the Fund with investment exposure greater than the value of the Fund's initial investment in the derivative instrument. As a result, these derivatives may magnify or otherwise increase losses to the Fund. Derivative instruments may not correlate well with the performance of the securities or asset class to which the Fund seeks exposure. Derivatives may be illiquid and difficult to price, and the counterparty to a derivatives contract may be unable or unwilling to fulfill its obligations to the Fund. The Fund's use of **leverage**, via short sales or derivatives, may cause volatility in returns as it typically magnifies both gains and losses.

This is not a complete outline of the risks involved in investing in the Fund. Investors are encouraged to read the prospectus carefully prior to investing.

The Alerian MLP Index is a composite of the most prominent energy master limited partnerships, whose constituents represent approximately 85% of the total float-adjusted market capitalization, calculated by Standard & Poor's using a float-adjusted market capitalization methodology on a price-return basis. Alerian MLP Index, Alerian MLP Total Return Index "AMZ" and "AMZX" are trademarks of Alerian. The S&P 500 Index "SPTR" is an index of 500 stocks chosen for market size, liquidity and industry grouping, among other factors. The S&P 500 is designed to be a leading indicator of U.S. equities and is meant to reflect the risk/return characteristics of the large cap universe. Nothing contained in this communication constitutes legal, tax, or investment advice. Information provided herein is accurate as of the date provided and may be changed or updated without any notice to you. Investors should consult their counsel for advice and information concerning their particular situation. Energy Income Partners, LLC is an investment advisor registered with the Securities and Exchange Commission.

⁹ Some of Morningstar's proprietary calculations, including the Morningstar Rating™, are not customarily calculated based on adjusted historical returns. However, for new share classes/channels, Morningstar may calculate an extended performance Morningstar Rating. The extended performance is calculated by adjusting the historical total returns of the oldest share class of a fund to reflect the fee structure of the younger share class/channel, attaching this data to the younger share class' performance record, and then compounding the adjusted plus actual monthly returns into the extended performance Morningstar Risk-Adjusted Return for the three-, five-, and 10-year time periods. The Morningstar Risk-Adjusted Returns are used to determine the extended performance Morningstar Rating. The extended performance Morningstar Rating for this fund does not affect the retail fund data published by Morningstar, as the bell curve distribution on which the ratings are based includes only funds with actual returns. The Overall Morningstar Rating for multi-share funds is based on actual performance only or extended performance only. Once the share class turns three years old, the Overall Morningstar Rating will be based on actual ratings only. The Overall Morningstar Rating for multi-share variable annuities is based on a weighted average of any ratings that are available. While the inclusion of pre-inception data, in the form of extended performance, can provide valuable insight into the probable long-term behavior of newer share classes of a fund, investors should be aware that an adjusted historical return can only provide an approximation of that behavior. For example, the fee structures of a retail share class will vary from that of an institutional share class, as retail shares tend to have higher operating expenses and sales charges. These adjusted historical returns are not actual returns. The underlying investments in the share classes used to calculate the pre-performance string will likely vary from the underlying investments held in the fund after inception. Calculation methodologies utilized by Morningstar may differ from those applied by other entities, including the fund itself.
