The status of any capital gains distributed to shareholders (i.e. whether or not they are considered short-term or long-term) depends on how long the Fund owned the securities that produced the gain- not how long the shareholder owned shares in the Fund.

* Short-Term Capital Gains- capital gain income from assets held one year or less and is taxed at the investor's ordinary income tax rates in effect for the year.

Long-Term Capital Gains- capital gain income from assets held longer than one year and are generally taxed at a special long-term capital gains rate.
